

1: Different Working Environment for Kiosks Integrated with Our Touch Monitors / Touch Panel PCs

Indoor Kiosk

Semi-outdoor Kiosk (with Cover for Protect)

Outdoor Kiosk

Remark: Mostly our Touch Monitors / Panel PCs are for indoor, we also have special outdoor models, but we highly advise client to add cover on kiosk.

2: TDD Indoor Touch Monitor: With normal brightness (around 250-350nits) Panel and normal **Air Bonding** for TFT & Touch Panel, without cooling fans

3: TDD Outdoor Touch Monitor: With **AG (Anti-glare), UV Filter & Anti-mist Optical Bonding, Rugged High Bright TFT Panel (800 – 1000 nits) and Auto-dimmer, Sturdy Aluminum Front Frame and Dust Protection with Smart Fans**

Indoor Touch Monitors

Outdoor Touch Monitors

Important Questions about Working Environment:

- 1: Operating Environment:** Will the kiosk with our **Touch Monitors / Panel PCs** be used indoor, outdoor, or in semi-outdoor (with cover for protection)?
- 2: Weather Resistance:** Will it work under direct sunlight, rain, and snow?
- 3: Moisture Exposure:** Will it work under misty environments, such as near beaches or car wash shops?
- 4: Continuous Operation:** Will it need to work non-stop 24/7, what is the min & max environment working temperature?
